

Heatmap visualization of the correlation matrix for the 2018-2019 season. The x-axis and y-axis both list the 20 teams. The color scale ranges from 0.0 (light yellow) to 1.0 (dark red). The diagonal is dark red, indicating a correlation of 1.0 for each team with itself. The matrix is symmetric, with the lower triangle mirroring the upper triangle. The heatmap shows a complex pattern of correlations, with some teams (e.g., Team 1, Team 17) showing higher correlations with multiple other teams, while others show lower correlations.
